Mythical Garden

took place over the course of three months spanning the little town of Tutzing at Porsche-infested Lake Starnberg.

With sculptures in the public space referencing antique and contemporary archeology and the absence of publicly visible trash in the rich areas, by placing sculptures modeling the sites of origin of our materials – the dark corners of Berlin, where anonymity and poverty meet.

PEGASUS MYTHICAL OVERGADEN

The works from Mythical Garden were transformed into Mythical Overgaden as a rebuild of the Perseus and Medusa myth for an art-festival in Munich.

Taxes & Tantra

was a salon where one could receive simultaneous tantric massage and tax consultation by the same person.

In order to make an appointment, one needed to fill out a form modeled after German tax forms and choose the fiscal issues to be talked about, as well as which body parts should be massaged with which oils and objects.

The walls were lined with vertical blinds, the oils stored in the “Billy-Oil-Bar” and the visitors massaged on german flag colored towels, that were collected under the massage table for mental massage.

Pegasus Product (qp) started as a joint venture around 2019 to explore and expand ways of artistic practice.

qp rearranges and mangles societal artifacts, symbols and values. And attempts to appropriate and garble marketing mechanisms, marketable aesthetics, aspects of usefulness and meaningfulness to create an art practice that integrates its own conditions.

For the virtual show “Dove Environment”, material reclaimed from furniture that has been disposed of in the streets took the form of furniture found in the art collectors home . At “Taxes & Tantra” the gallery became a place for tantric massage with simultaneous tax advisory performed by the same person , or for “Sülzen-Saal” a restaurant for an edition of 150 servings of head cheese in the shape of the german parliament. Despite the chair being a microwave, the table a clothes drying rack, the plate a microwave dish – the format of sitting at a table to eat is known and can be performed just as usually and the gallery becomes a restaurant.

It’s about and letting different fields flow into each other, and finally escaping the dichotomy of market suitability and non market suitability in favor of sharpened attention and questioning one’s own instincts and dismantle the ever-powerful cliché conceptions of the generic.

What do I consider beautiful? What do I consider art? How to deal with and where do all those presumptions come from? The tasty and the disgusting may be closer than thought of. Confronting this may be a chance to learn.

While one is free to regard qp`s objects for merely their aesthetic character, they are always props integrated into a greater conception that forms the art-work, and are meant to be used and physically interacted with. Humor combined with mundane activities helps us provide a low threshold of entry.

The universe that lies within the works may be explored and expands over the hours, days, and hopefully years to come.

Working as a group we try to protect ourselves from the framing of the artistic genius cliché, which mostly is a lie, told to sell something. Also our experience shows that there is great power in developing works within a conversation from the start. Often the communication is about the art and flanged on retroactively. For us it is inherent part of the work.

While there is some margin to treat the projects as modules and adapt them to new iterations, they are always site- and context-specific and increasingly the participatory aspect becomes central to them.

Sülzen-Saal

The showroom of the gallery was turned into a restaurant referencing the rustic interior of inns, as found in rural Germany.

qpPDSL Pegasus Product Parcel Delivery Service and Logistics

was a service point for sending immaterial goods at the Galerie Georg Nothelfer New Positions booth at Art Cologne 2022.

Visitors could assemble a parcel by channeling the immaterial good (or bad) they would like to send, while placing a mixture of dust, shredded money and feathers into the container.

The container would then be energetically sealed and could either be sent by soft-delivery by cargo drone powered by bavarians or taken for self-delivery.

“Time and time again, we wish to become part of eternity, or wish to know that we are truly ourselves.”
Pegasus Product is opening the Pegasus Product Power Peckerl Paradise in Bad Gastein for the 2023 Sommerfrische Kunst. Now is your chance to go to your utmost: Let the Anima-Inscibtor eternalize your innermost into your innermost! Your individual oracle will show you which symbol it is, that only suits you. In a very personal procedure it will be inscribed into your soul. The desired effects are transferred to you. The Pegasus Light Battery, charged in the waterfall, supplies the necessary energy. In order to intensify the long-term effect, you will also receive an aura image of your new soul peckerl exclusively in Bad Gastein. We are looking forward to seeing you!

The nine Image Panels tell the Lore of the Power Peckerl Paradies. How Energy is collected from the Waterfall. Of reception at reception, affirmation with the oracle and finally of inscription of the Power Peckerl.

The customers name each of the four silicon joints and throw an oracle.

The medium helps to interpret the created arrangement.

The oracle arrangement is inscribed to the soul with the anima inscribtor,

and finally the aura proof-foto rolled into a crystal pendant.
